DIABETES: SPIRALLING OUT OF CONTROL

New figures from the **International Diabetes Federation** reveal the alarming growth in the prevalence of diabetes around the world.

1 in 10
adults have
diabetes

537 million

adults around the world are
living with diabetes

643 million

adults are predicted to be living
with diabetes by 2030

Almost 1 in 2

adults living with diabetes
are undiagnosed

4 in 5

people with diabetes live in low
and middle-income countries

6.7 million

adults are estimated to have
died due to diabetes or its
complications in 2021

966 billion USD

global health expenditure due
to diabetes in 2021

Source: IDF Diabetes Atlas 10th Edition 2021,

Diabetes is a **significant global challenge** to the health and wellbeing of individuals, families and countries.

Governments must **turn words into action** to provide affordable and uninterrupted access to diabetes care for all people who require it and help prevent the condition in people at high risk.

If not now, when?
